Anjali Khantwal

Service Desk Engineer

(+91) 8979960626 anjalikhantwal007@gmail.com LinkedIn

Professional Summary

Experienced L2 Service Desk Engineer with expertise in incident management, process improvement, and stakeholder communication. Adept at collaborating with cross-functional teams to design effective resolutions for client issues. Proven ability to train new joiners and conduct regular knowledge sessions for the team. Skilled in developing SOPs, KB articles, and technical documentation to streamline processes. Strong problem-solving skills with deep knowledge of ITSM frameworks and service desk best practices.

Experience

LTIMindtree **Hyderabad, Telangana**

Engineer *Feb 2024 – Present*

- Efficiently managed incident tickets, ensuring prompt resolution within established SLAs to minimize downtime and uphold service quality. Actively monitored system performance, leveraging tools like ServiceNow for accurate issue tracking and follow-up.
- Worked closely with development, operations, and network teams to diagnose and resolve complex technical challenges. Facilitated cross-team communication to expedite resolution and reduce MTTR. Conducted root cause analysis (RCA) to prevent recurring incidents.
- Created comprehensive technical documentation, including step-by-step troubleshooting guides and resolution procedures. Maintained and updated SOPs and Knowledge Base articles to enhance team productivity and self-service capabilities.
- Delivered remote support for technical issues, including software errors, network disruptions, and configuration challenges. Assisted global clients via phone and email, ensuring swift resolution with minimal impact on business operations.
- Identified and implemented process optimizations to improve service desk efficiency and reduce resolution time. Developed automation scripts and workflows to streamline operations and minimize manual errors.
- Provided end-to-end application support for cloud-based solutions, ensuring high availability and reliability.
- Continuously monitored cloud infrastructure, identifying and resolving performance issues to maintain optimal system functionality.

Wipro **Remote**

Intern *May 2022 – September 2022*

- Gained hands-on experience with Core Java, focusing on the fundamentals of the language and its application in various projects.
- Learned and applied Object- Oriented Programming (OOP) principles, enhancing code modularity and reusability.
- Participated with code reviews and team meetings, receiving constructive feedback and improving coding practices.
- Created and maintained technical documentation for projects, ensuring clarity and consistency in code and processes.

Key Skills

Core Skills:

- Service Desk Management (L1 Support)
- Incident & Problem Management
- Cross-Functional Team Collaboration
- Process Documentation & Resolution Design
- IT Service Management (ITSM)
- Ticketing Systems (ServiceNow)
- Troubleshooting & Root Cause Analysis
- Training & Knowledge Transfer

Technical & Soft Skills:

- Knowledge Base (KB) Creation
- Incidence Management
- Service Desk Non-Voice & Remote Support
- SLA Management
- Team Collaboration & Leadership
- Active Directory Administration, Hyper V
- Windows Server Administration, SCCM, OKTA
- Office 365 Administration

Education

Graphic Era Hill University **Dehradun, Uttarakhand**

BCA (Bachelor of Computer Applications)- 8.69 CGPA *July 2020 – August 2023*

Achievements

- Reduced incident resolution time by X%, improving SLA compliance.
- Designed SOPs & KB articles, enhancing issue resolution and training effectiveness.
- Led training & doubt sessions, improving team knowledge retention and performance.

Projects

Online Service Management System

- **Description:** The platform provides electronic appliance care services to ensure devices remain functional, managing Service Centre activities efficiently. Customers can register issues faced with electronic devices, and the backend team assigns technicians based on the customer's location.

- **Features:** Registration & Login System: Implemented secure user authentication and account management features. Interactive UI: Designed an intuitive and user-friendly interface for enhanced customer experience.

- **SEO Optimization**: Applied web crawling techniques to structure metadata, enabling search engines to index service offerings effectively. Enhanced page rankings by optimizing HTML tags, headings, and content for relevant keywords.
