PROFILE

Experienced Software Engineer with 3+ years in Java development and support. Proven expertise in application performance optimization, bug resolution, customer issue triaging, and REST API support. Strong problem-solving skills with experience in both development and operational support environments. Adept at handling real-time incidents, performing root cause analysis, and ensuring continuous system availability.

EDUCATION

Galgotias University *Greater Noida, India*

Bachelor of Engineering in Computer Science & Engineering 2014 – 2018

SKILLS

Technical: Java, Spring Boot, Microservices, RESTful API, SQL, Python (Pandas, NumPy, SciPy, Matplotlib, Seaborn), Statistics, ETL

Tools: PostgreSQL, MySQL, SQL Server, DB2, Big Query, Power BI, IBM Cognos, Google Looker Studio, Google Sheets, Git, Jenkins, Jira, Confluence, WinSCP, Git, Postman, Jasper Studio, Data Visualization, Linux.

Soft Skills: Problem-Solving, Communication, Leadership, Analytical Thinking, Team Collaboration, Adaptability, Decision-Making, Reliability, Structured, Analytical, Collaborate.

CERTIFICATIONS

- Accenture North America – Data Analytics & Visualization Job Simulation – Forage
- Career Essentials in Data Analysis – Microsoft & LinkedIn
- Learning Data Analytics Part 1 & 2 – LinkedIn
- Quantium - Data Analytics Job Simulation – Forage
- Tata Group - Data Visualization: Empowering Business with Effective Insights – Forage
- Data Science and Analytics – HPLife

EXPERIENCE

ATCS (A Nagarro-Based Company) *Jaipur, India*

Engineer Oct 2021 – Sept 2024

- Provided application support and maintenance for enterprise-level automotive systems.
- Managed incident triage, logged tickets, and ensured SLA compliance for client-side issues.
- Led migration of server environments from Windows to Linux (SUSE) for better stability and performance.
- Developed and debugged scalable microservices using Java, Spring Boot, and RESTful APIs.
- Improved data query performance by optimizing SQL in DB2 and PostgreSQL.
- Collaborated with cross-functional teams to resolve production bugs and conduct RCA.

PROJECTS

PASS – Mercedes Benz (Automotive) | Java, Spring Boot, DB2

- Supported and enhanced the RDR (Retail Delivery Rate) system.
- Handled real-time customer issues, performed bug fixes, and ensured system uptime.
- Coordinated with downstream systems for data consistency and updates.

Vehicle Experience Program – Mercedes Benz Canada | Java, DB2, SUSE Linux

- Monitored daily application health and user issues.
- Conducted server-side troubleshooting and migration.
- Supported employee vehicle leasing application with regular patch and upgrade cycles.

RCAAID – Vehicle Assistance System | Java, DB2

- Developed features to support client-reported issues.
- Provided L2/L3 support with detailed documentation and fixes.
