arunkumarsaini596@gmail.com
linkedin.com/in/arun-kumar-897816227

TECHNICAL SKILLS

Programming Languages
- C++
- Python
- JavaScript

Development
- HTML / CSS / REACT JS
- MySQL / SQL

Platforms
- VSCode
- Figma
- GitHub

Skills
- PCB Design
- Hardware Integration
- Auto Cad (basic)

COURSE WORK

- Data Structures and Algorithms
- Problem Solving
- Operating System
- Database Management System
- Computer Networking
- Power Electronics
- Electronic Devices and Circuits

EXTRA-CIRRICULARS

Participated
- Flow Hackathon
- Flipkart GRID 5.0
- Zephyr - ROBO ROCCER
- Snap AR-Lensaathon

Coordinated
- IETE member
- Zephyr Coordinator 2023

Certification
- Database Management System | Nptel 2023
- TCS ion career edge | TCS 2022
- Snap AR Hackthon | hack2skill 2022
- Entrepreneurship | Nptel 2023
- Winner in Lan Gaming

INTERNSHIP EXPERIENCE

CELEBAL INTERN

CELEBAL TECHNOLOGIES | 05/2023 - 07/2023

- Developed and implemented data science solutions for diverse projects, including a comprehensive ToDo list application and an eCommerce website.
- Contributed to the enhancement of the ToDo list application by implementing machine learning algorithms, resulting in a 80% improvement in task prioritization accuracy.
- Collaborated with cross-functional teams to gather, preprocess, and analyze large datasets, optimizing the performance of the eCommerce website and reducing page load times by 60%.

PROJECTS

VENTILATOR SUPPORT SYSTEM FOR INFECTIOUS DISEASE PATIENTS

01/2024 - 03/2024

- Led the design and development efforts of the IoT infrastructure, utilizing Arduino Nano for precise ventilator pressure control through ambu bag manipulation. Integrated Raspberry Pi for face mask detection and temperature sensing at entry points to enhance patient monitoring and ensure adherence to safety protocols..
- Conducted comprehensive testing and validation of the IoT-enabled ventilator support system, ensuring reliability and accuracy of Raspberry Pi face detection and temperature sensing.
- Utilized Arduino Nano for precise ventilator pressure control using an ambu bag and Raspberry Pi for face detection and temperature sensing at entry points. And using python in Rashbhery pi for face mask detection.

INSTAGRAM-CLONE WEB APP

01/2023 - 02/2023

- Conceptualized and developed a cutting-edge Instagram clone, showcasing creativity and proficiency in web development.
- Implemented a comprehensive set of features, including photo uploads, real-time liking functionality, and a robust commenting section, replicating the core functionalities of Instagram.

ROBO CAR

07/2023 - 08/2023

- Led the design and integration of a robotic car, utilizing Arduino Uno as the microcontroller for precise control.
- Implemented a 1293 motor driver to ensure efficient and reliable movement, enhancing the overall functionality of the robotic system.
- Integrated Bluetooth modules for wireless communication, enabling remote control and data transfer between the robotic car and external devices.

EDUCATION

- **B.TECH in Electronics and Communication Engineering**
  Arya College of Engineering and I.T | 2020 - 2024
- **Higher Secondary Education**
  Sarvodya Senior School |2019 - 2020
- **Secondary Education**
  Sarvodya Senior School | 2017 - 2018
