Location: Jaipur (Willing to Relocate)

Professional Summary

Proactive Application Support Engineer with 2+ years of experience delivering L1/L2 production support, SQL troubleshooting, and Salesforce CRM administration in BFSI/NBFC domains. Skilled at resolving high-priority incidents within SLA, performing root cause analysis (RCA), and ensuring 99%+ system uptime. Adept at ticket management (JIRA, Zoho Desk), LOS/LMS support (FinOne, Omnifin), and data integrity validation. Recognized for driving operational efficiency, reducing downtime, and boosting user satisfaction across enterprise applications.

Core Competencies

- Application Support & Troubleshooting (L1/L2)
- Incident & Problem Management
- Salesforce CRM Administration (Users, Roles, Security)
- LOS/LMS Platforms: FinOne, Omnifin
- Ticketing Tools: JIRA, Zoho Desk
- UAT & Release Management Support
- SQL Querying & Data Integrity Validation

Technical Skills

Applications: Salesforce CRM, LOS/LMS (FinOne, Omnifin)

Database: MySQL (SQL Queries, Joins, Subqueries, Data Integrity Checks)

Reporting: Power BI, Excel (PivotTables, VLOOKUP)

Ticketing Tools: JIRA, Zoho Desk

Certifications

- Salesforce Certified Administrator
- Oracle Cloud Infrastructure Foundations & Architect Associate
- Google IT Support Professional
- Power BI Basics
- Salesforce Trailhead Superbadges (Apex, User Access, Data Protection)

Professional Experience

SMFG India Credit Co. Limited, Jaipur

Credit Manager (Dual Role: Credit Underwriting & Application Support) **Aug 2024 – May 2025**

- Executed comprehensive risk assessments for loan applicants, analyzing credit ratings, borrowing histories, and risk factors to minimize defaults and optimize approval decisions.
- Resolved technical underwriting discrepancies, boosting approval rates by 15% through targeted documentation fixes and system enhancements.
- Generated and tracked technical support tickets with IT teams, identifying recurring issues and contributing to root cause analysis (RCA) reports that prevented future disruptions.
- Developed and maintained disbursal tracking reports and credit MIS using Excel, enabling data-driven insights for senior management.
- Delivered L1/L2 application support for LOS/LMS platforms, resolving complex technical issues and coordinating IT fixes to maintain 99% system uptime.

BCITS Private Limited, Jaipur
Data Validation Operator (Project-Based) **Feb 2024 – May 2024**

- Diagnosed and resolved data communication failures in meter interrogation processes, coordinating manual readings for faulty devices to ensure 100% data accuracy and compliance.
- Supported network administrators in deploying application upgrades, patches, and testing protocols, resulting in zero-downtime implementations.
- Documented system modifications, performance metrics, and upgrade outcomes, facilitating seamless knowledge transfer and regulatory audits.
- Collaborated with cross-functional teams to rectify data errors, achieving high-precision processing and reducing error rates by 25%.

Aavas Financiers Limited, Jaipur
Application Support Engineer **Nov 2022 – Jan 2024**

- Configured and managed user profiles, role hierarchies, and security protocols in Salesforce CRM, ensuring robust compliance and minimizing access-related risks.
- Performed in-depth root cause analysis on system defects, implementing targeted solutions that enhanced application performance by 30% and reduced downtime.
- Conducted hands-on training for 50+ end-users on Salesforce and integrated tools, driving a 25% increase in user adoption and operational efficiency.
- Safeguarded data integrity through record merging, ownership updates, and maintenance protocols, eliminating inaccuracies in critical loan workflows.
- Resolved 100+ critical support tickets within SLAs across diverse business units, demonstrating exceptional troubleshooting under pressure.
- Provided nationwide L1/L2 support for LOS, LMS, and Salesforce CRM, addressing loan workflow bugs, system glitches, and user access issues.
- Handled 500+ tickets with 95% resolution rate, preventing escalations and supporting uninterrupted business operations.

Feedback Infra private Limited, Jaipur
Site Engineer (Technical Operations & Support) **Oct 2017 – July 2019**

- Maintained and optimized hardware/software ecosystems, including field data tools, mobile apps, and dashboards, ensuring reliable performance for on-site operations.
- Collaborated with engineering and support teams to troubleshoot and resolve technical challenges, fostering strong client relationships and repeat business.
- Verified connectivity and functionality of monitoring devices (e.g., load break switches, RMUs, DT meters, smart meters), achieving 98% operational reliability.
- Integrated data from electrical equipment into centralized MIS systems using Excel macros, SQL queries, and mobile interfaces, enabling real-time analytics.
- Oversaw DDUGJY and IPDS project monitoring, enforcing compliance with specifications and timelines to deliver projects on schedule and within budget.

Education
Bachelor of Technology in Electrical Engineering
Shri Bhawani Niketan Institute of Technology & Management, Jaipur
2012 – 2021 Demonstrated resilience by completing degree post-medical recovery, maintaining

---

Key Achievements

- Optimized system performance by pinpointing bottlenecks via data analysis, resulting in 30% faster application response times.
- Elevated customer satisfaction scores through prompt, accurate resolutions to technical inquiries, achieving 95% positive feedback.
- Streamlined data integrity protocols, reducing errors in record maintenance and ownership transfers by 40%.
