PROJECTS

Automatic avoiding accident car

An automatic collision avoidance system is a car that has safety features that help prevent or mitigate accidents . These features include technologies such as automatic emergency braking (AEB), lane departure warning (LDW), and adaptive cruise control (ACC). These systems use sensors, cameras, and radar to detect potential hazards and alert the driver or automatically control the car as needed.

PERSONAL DETAILS

Date of Birth : 21/05/2004

Marital Status : Unmarried

Nationality : Indian

Place : Gonda

SKILLS

Basics knowledge of computer

Electronic Devices: A strong understanding of electronic components like resistors, capacitors, diodes, transistors, and operational amplifiers is fundamental.

Embedded Systems: Understanding embedded systems, including microcontroller programming and interfacing with peripherals, is increasingly important.

Power Electronics: Knowledge of power electronics for energy conversion, control, and management is relevant in many applications.
