Professional Summary:

Experienced Technical Support Engineer with over 3 years in the tech industry, specializing in Microsoft Power Platform, Azure Data Services, and Microsoft 365 cloud solutions. I am currently working at LTIMINDTREE as part of Microsoft's Data Integration PG team, delivering end-to-end Power BI development and technical support to global enterprise clients. Skilled in handling support scenarios across Microsoft 365 and Power Platform services—including Exchange Online, SharePoint, Teams, OneDrive, Power BI, Fabric and Gateway. Strong problem-solving, debugging and troubleshooting complex issues, driving product adoption, ensuring seamless data integration, and collaborating with cross-functional teams to deliver impactful, data-driven business insights.

Skills:

Cloud Security: Azure Active Directory (Azure AD), Conditional Access, On premises and Vnet Data Gateway configuration
Power Platform: Power BI, Power Apps, Dataflows, Data Integration, Fabric, Semantic models
Azure Services: Azure Data Factory, Azure Storage Blob, Virtual Network
Support Tools: Kusto Explorer, Fiddler Classic, Microsoft Admin Center, Incident Management (ICM)
Log Analysis & Debugging: Analyzing Desktop Logs, Network Logs, and Telemetry for troubleshooting

---

Professional Experience:

LTIMindtree Limited | Technical Support Engineer
April 2022 – Present

- Deliver end-to-end technical support for Microsoft's Power Platform, with deep specialization in Power BI, Dataflows, Azure Data Factory, and Azure Synapse Analytics, supporting global enterprise customers in real-time.
- Operate in three rotating shifts aligned with Redmond (PST) hours, ensuring uninterrupted support coverage and responsiveness across US, EMEA, and APAC regions.
- Work directly with Microsoft product engineering teams to investigate complex issues, reproduce bugs, perform telemetry-based diagnostics, and provide feedback for product improvements.
- Provide expert troubleshooting for issues related to Power BI report performance, dataset refresh failures, gateway connectivity, API/Graph queries, and service outages.
- Perform root cause analysis (RCA) for high-priority incidents (Sev A/B), document resolutions, and implement preventive measures to reduce recurrence.
- Leverage tools such as Desktop logs, Fiddler, Browser Dev Tools, Kusto (KQL), and Azure Portal for deep dive troubleshooting and debugging.
- Manage identity and access-related issues using Azure Active Directory, including Multi-Factor Authentication (MFA), Conditional Access Policies.
- Configure, monitor, and troubleshoot On-Premises and VNet Data Gateways, ensuring secure and reliable connectivity for hybrid data integrations.
- Handle issues related to Power BI embedded, REST APIs, PowerShell scripts, and other platform automation components.
- Provide technical guidance for Microsoft Teams, SharePoint, and OneDrive integrations within enterprise M365 environments.
- Participate in regular bug triage meetings, verifying reported bugs from customers and internal sources, escalating to Microsoft teams as needed.
- Draft and maintain internal Troubleshooting Guides (TSGs), Knowledge Base (KB) articles, and FAQs to accelerate support readiness and training.
- Work with Product Managers, Cloud Engineers, and DevOps teams to improve supportability, enhance customer experience, and increase product adoption.
- Resolve compatibility and configuration issues with various data gateways. Assist customers with configuring On-Premises and VNet Data Gateways for secure data transfers.

- Troubleshoot data source connectivity issues (e.g., Azure SQL Database, SharePoint, REST APIs).
- Optimize dataflows and dataset refreshes in Power BI for better performance.
- Identify root causes of recurring issues and implement permanent solutions. Manage incidents, including escalation to engineering teams if necessary.
- Ensure SLA compliance and prioritize customer satisfaction during issue resolution.
- Collaborate with cross-functional teams, including Microsoft's engineering and product teams, to resolve complex issues.
- Mentor junior team members and provide guidance on technical support processes.

Impressico Business Solutions Pvt Ltd | Trainee Engineer
October 2021 – February 2022

- Participated in understanding and analyzing software requirements and specifications to design effective test cases.
- Completed tasks efficiently and timely, as instructed by engineering managers.
- Shadowed senior staff members and asked questions to advance engineering knowledge.
- Conducted functional testing of web and mobile applications to ensure they meet specified business requirements.
- Performed application functional testing to validate core functionalities, workflows, and user scenarios against business needs.
- Collaborated with development teams to communicate bugs and suggest improvements for better software performance.
- Gained hands-on experience in preparing test reports and maintaining detailed records of test execution

---

Education:

Bachelor of Technology in Electronics and Communications Engineering | Samskruti College of Engineering and Technology | 2017 - 2021

Achievements:

- Microsoft Summit Business Unit of the year Award 2023
- Spot On Super Crew Award
