EDUCATION

North India Institute of Technology, Bijnor, UP, India 2019 - 2023
Bachelor of Technology in Computer Science and Engineering | CGPA : 7.79/10

Goyal Public Senior Secondary School, Bijnor, UP, India
Intermediate in Science (CBSE) | 65.4 %

Relevant Coursework : Computer Networks, Infrastructure, Linux, Core Java, HTML, CSS, Operating System, Basic Algorithms and Data Structure

PROFESSIONAL EXPERIENCE

TRAINEE ENGINEER | NTPL DIGITAL PVT LTD NOIDA| Computer Networking | Infrastructure | Linux DEC 2024 - Present

Trained in networking, infrastructure management, and Linux administration.

Networking:

Configured **routers and switches** (Cisco/Juniper) with VLANs, inter-VLAN routing, and STP.
Implemented **routing protocols** (RIP, OSPF, EIGRP, BGP) for efficient data flow.
Set up **firewalls (Cisco ASA)** with ACLs, NAT/PAT, and VPNs (IPSec, SSL).
Monitored networks using **SNMP, Syslog** for performance and troubleshooting.
Managed **wireless networks, SSID segmentation, and authentication (RADIUS, TACACS+).**
Deployed **DHCP, DNS, and QoS policies** for optimized network performance.

Infrastructure:

Server Management: Configured and maintained **Windows & Linux servers**.
Active Directory: Managed **AD, LDAP, and Group Policy**.
DNS & DHCP: Configured **network addressing and name resolution**.
Virtualization: Worked with **VMware ESXi, Hyper-V, VirtualBox**.
Storage & Backup: Implemented **RAID, NAS, SAN, and server backups**.
Network Security: Configured **firewalls (Cisco ASA)**.
Remote Access: Managed **RDP, VPN**.

Linux:

User & Permission Management, File Management, Process Management, Process Management, Networking, System Monitoring, File Permissions, Package Management, Text Processing, Disk & Storage Management, System Logs & Services, SSH & Remote Access, Backup & Archiving, Exit & Logout Commands.

Microsoft Ignite Aug 2024 – Oct 2024

(Designing and Implementing Microsoft Azure Networking Solutions)

- Understanding of on-premises virtualization technologies, including: VMs Virtual networking.
- Understanding of network configuration, including TCP/IP, Domain Name System(DNS), Virtual Private Area Network(VPNs), firewalls, and encryption technologies.
- Understanding of software define networking.

PROJECTS

Secure Enterprise Network with VLANs, Firewall, and VPN with Network Monitoring

- Designed and implemented a **secure enterprise network** with VLAN segmentation and **Layer 3 inter-VLAN routing**.
- Configured **ASA Firewall** for packet filtering, NAT, and secure remote access via **VPN (IPSec/SSL)**.
- Integrated **SNMP and Syslog** for real-time **network monitoring, logging, and threat detection**.
- Applied **ACLs and QoS** to enhance security, optimize traffic, and prioritize critical applications.

TECHNICAL SKILLS

Networking & Systems: Computer Networking, Linux, Infrastructure.
Web Technologies: HTML, CSS, JAVASCRIPT

Data Structures & Algorithms: Basic understanding of DSA concepts.
