Skills

C++ | C |Python | OOPS | Data Structures|Computer network| Operating System| DBMS| HTML| CSS | Javascript| SQL | React.js |Github

Education

Meerut Institute of Technology, India **2021- 2025**

- Bachelor Of Technology in computer science and engineering | CGPA: **7.1**

Gateway International School, India • **2020-2021**

*CBSE(Class XII), Aggregate:**80%***

Omega World Junior High School , India **2018-2019**

- *CBSE(Class X), Aggregate:**82%***

Projects

Sudoku Solver ***Sep 2023***

- The Sudoku Solver project uses Machine Learning and backtracking algorithm to solve sudoku puzzles faster and more efficiently.
- The objective is to fill 9*9 grid so that each column,each row,each of the nine boxes contains the digits from 1 to 9.

Chatbot **Mar 2024**

The Chatbot is a computer program that simulates and processes human conversation,allowing human to interact with digital devices as if they were communicating with a real person.

- *This project leverages a combination of Python and Machine learning algorithms to provide the feedback to the user's query.*

Professional Certifications

Python Certification |Issued By Infosys(Springboard) **Feb 2024**

- Through this course, I gained basic and in-depth knowledge of Python language and it's practical applications.

Machine Learning and Image Processing |Issued By thingQbator(CISCO) **Mar 2024**

- Through this course, I gain comprehensive knowledge and practical skills in Machine Learning and its algorithms, utilizing various algorithms using Python, and other essential technologies, enabling me to embark on a rewarding career in the related field.
