WORK HISTORY

SYSTEM ENGINEER

01/2021 to Present

TCS | Chennai, IN

- Provided 24/7 support for web- and client-based applications, file and data feeds and batch processes to prevent impact to business.
- Worked closely with other business analysts, development teams and infrastructure specialists to deliver high availability solutions for mission-critical applications.
- Delivered end-to-end L2 production support aligned with ITIL best practices, focusing on incident, change, release, and major incident (MIM) management.
- Used ServiceNow (Fujii & SaaS) for ticket triaging, SLA monitoring, service request fulfilment, and escalation handling to ensure timely resolution.
- Actively monitored systems using AppDynamics and conducted root cause analysis to prevent issue recurrence and reduce incident volumes with help of creating or editing rules.
- Executed and maintained complex batch jobs using Autosys as per App and Business team request.
- Interfaced with customers and developers to diagnose problems and implement configuration requirements and solutions.
- Performed software application and disaster recovery testing to guarantee business readiness following fail-overs.
- Analysed and mapped data and wrote SQL scripts to extract data from SQL and Oracle databases.
- Created and maintained knowledge base articles, playbooks, and SOPs to streamline issue resolution and onboarding.
- Automated recurring manual tasks using scripts and tools, improving overall team efficiency and reducing human error
- Managing ticketed query system and ensuring comprehensive database of queries and resolutions is kept up to date.
- Mentored junior team members and supported people management responsibilities, contributing to team cohesion and performance.
