Techno-Commercial Experience dealing with Defense, Smart Cities, Central and State Government, Homeland Security, Railways, Telecom, Information Technology, Power, Education, Oil and Gas and other Sectors

Career Objective:

To be part of the organization where the management rewards loyalty, honesty and ambition of an employee. Handle assignments to head overall operations, strategy planning, business process, quality management and finance. I always look for challenging opportunities and simulating work Culture that inspires to scale new heights.

Profile and Strengths:

- 28 years of Techno-Commercial experience working in the Defense, Smart Cities. Railways, Government, Homeland Security, Telecom, IT and Medical Sector.
- I have very good knowledge and experience of establishing multinational OEM's like Nicholas Piramal, Philips, Keithley, HUBER+SUHNER, Thales, Ericsson Hitachi, Juniper, Micro Focus, Trend Micro, Kaspersky Labs in the Defense, Smart Cities, Railways, Education, Airports, Homeland Security, Power Industry, Oil and Gas Sector and the State and Central Government from scratch to a multi-million business venture.
- Having 100% success rate of winning large Enterprise deals from the Government Sector in the South Asian region.
- Have received many appreciations from the management of the organizations for my excellent work and order bookings.
- My connects in the industry are amazingly strong at all levels and I am known well by the Senior Bureaucrats, Government Officials, Defense officials, System Integrators. This helps me in getting appointments with them with zero efforts.
- Having versatile experience and contacts dealing with MoUD, IT Consultants, PMC Consultants, Municipal Corporations officials and wining contracts from Smart City Sector.
- Having good knowledge and relationship with key Channel Partners (Tier 1 and Tier 2 and Tier 3) on PAN India basis.
- Good knowledge and expertise in the field of Cyber Security, Information Technology Defence Equipment, RF & Microwave Components, Test and Measuring Equipment, Medical Instrumentation.
- Having versatile experience working on the Defence procurement procedure for selling Defense Capital Equipment to Defence Forces.
- Have versatile experience and connects with customers in Defense Forces, MOD, Homeland Security, PSU's, Government Ministries, BFSI, Railways, Transportation, Smart Cities, Telecommunications, Nanotechnology/ Semiconductor/CSIR Labs, Power Utilities, DRDO Labs, Space Organizations, Airports, Educational Institutes, ts, Ports & Dockyards.
- Consummate knowledge with proven ability of initiating and successfully implementing process improvement measures ensuring cost reduction.
- Fast track professional, successful in budgeting, planning, execution and resource monitoring with ability to handle multiple functions and activities in high pressure environments with tight deadlines.
- Highly motivated, positive and goal oriented, with demonstrated professionalism, highly developed analytical abilities as well as ability to build and lead effective teams.
- A highly successful individual with achievements of winning and cracking many turnkey projects from Defence, IT, Telecom, Homeland Security, Smart Cities, DRDO, ISRO and other Government Organizations.
- Professional knowledge on Defense Technology Transfer, collaborations, and joint ventures with Indian companies for meeting Defence offset clause.
- Knowledge on Trade Compliance Issues and taking trade compliance clearances for Defence equipment and complying to export trade regulations.
- Carried out Numerous Road Shows, Presentations on Defence Technology on PAN India basis.
- Good experience in getting vendors registrations done from DRDO Labs, BEL, HAL, IAF, Navy, Army and other Government agencies.
- Technically trained on Installation and Commission of Test equipment's, RF and Microwave Cables and other Defence products.

- Good knowledge on preparing Annual Maintenance Contracts of for the Hardware and Software Solutions.
