Mobile: +919911497471
Neb Sarai, New Delhi-68

Profile Summary

Results – driven System Engineer with 10+ years of expertise in Linux system administration, cloud infrastructure, containerization virtualization and workload automation. Proficient in AWS, Docker, GIT, VMware workstation and Tidal Workload Automation (TWA/TES). Experienced in Incident, Change and Problem Management, proactive monitoring, automation and improving system performance and uptime. Strong problem solving analytical skills and collaboration abilities to support enterprise IT operation and minimize downtime.

Technical Skills

- Operating System: Linux (RHEL-7/8, Centos 7.x, Ubuntu), Windows(7/8/10/11)
- Cloud & DevOps: AWS (EC2, ALB,S3, RDS, IAM, VPC, CloudWatch), Docker, K8S, GIT
- Workload Automation: Tidal Workload Automation (TWA/TES)6.x
- Database: MySQL, MS SQL Server(Querying, data extraction)
- Virtualization: VMware Workstation(VM's creation, snapshots, Backups, Migration)
- Monitoring Tools: Grafana, Prometheus
- Scripting: Shell Script (Automation, Monitoring, Backups)
- ITSM & Ticketing Tools: Jira, ServiceNow(Incident, Request, change Management)

Professional Experience

L2 support Engineer | Value Information Tech. Solution Pvt. Ltd. Bengaluru
Apr 2023 - Sept 2024

- Administered, optimized and maintained Linux environments to ensure system stability, performance and uptime.
- Installed, configured, patched and routine maintenance across production, UAT and Dev servers.
- Managed user accounts, groups, permissions and LVM and file systems for secure system operations.
- Implemented disk partitioning using fdisk, parted, and lsblk based on application requirements
- Managed server patching, updates, and package management using YUM, DNF and APT
- Implemented and managed Docker Containers across Dev, UAT and Production.
- Created and maintained Dockerfiles, optimized image sizes, and followed container security best practices.
- Troubleshot Docker container issues related to networking, storage volumes, resource limits, and application failures.
- Installed, configured, and managed NFS and Samba servers for secure file sharing across Linux and Windows systems.
- Managed AWS services including EC2, S3, EFS, EBS, IAM, ELB, VPC and CloudWatch for cloud operations.
- Monitored system health and performance with Prometheus and Grafana dashboards.
- Automated operational tasks using shell scripts improving efficiency by 30%.
- Proficient in using Git for version control, including branching, merging, and resolving conflicts.

- Managed Vmware Workstation VMs including creation, snapshots, resource allocation, performance monitoring.
- Collaborated with L3 teams for incident resolution to minimize system downtime.
- Executed Incident, Change, and Problem Management via ServiceNow, Jira, maintaining SLA compliance.
- Documented incident details, troubleshooting steps, and resolution in ITSM tools to maintain SLA compliance.

Senior Support Analyst | HAYS Business Solution Pvt. Ltd. Noida (UP)
July 2019 – Dec 2022

- Administered TIDAL Workload Automation (TWA/TWS) across Production, UAT, and Dev environments.
- Designed, scheduled, and monitored batch jobs, workflows, calendars, and dependencies on Linux-based systems.
- Performed job failure analysis, troubleshooting, and root cause analysis (RCA) to reduce batch failures and improve SLA adherence.
- Analyzed TIDAL logs, agent connectivity issues, and collaborated with application teams to implement permanent fixes.
- Managed resources, variables, alerts, notifications, and user access/permissions within TIDAL.
- Implemented job automation, migrations, and enhancements to improve operational efficiency and reliability.
- Executed TIDAL version upgrades and coordinated with vendor support for maintenance and patching activities.
- Developed shell scripts to automate repetitive operational tasks, reducing manual effort and improving process efficiency.
- Coordinated with application, database, and infrastructure teams to resolve scheduling and production issues.
- Prepared batch run reports, execution statistics, and operational documentation for audits and management review.
- Handled Incident, Change, and Problem Management using ServiceNow and Jira, ensuring timely resolution and SLA compliance.
- Conducted knowledge-sharing sessions to improve team technical capability and operational best practices.
- Monitored daily batch operations and provided 24×7 production support for business-critical workloads

Support Analyst | HAYS Business Solution Pvt. Ltd. Noida (UP)
Dec 2014 – July 2019

- Monitored Tidal job executions, queues, agents, connections and schedules to ensure SLA compliance.
- Managed daily batch operations, including job validation, execution tracking, exception handling and post-run analysis.
- Performed first-level troubleshooting, job reruns, escalations and incident ticketing.
- Generated batch performance reports using SQL queries and Excel dashboards.
- Provided 24×7 and on call support for Tidal operation to ensure continuous job execution.
- Executed L1 tasks for PeopleSoft Process Monitor like restart, delete, rerun instances.

Consultant | IGNOU Headquarter New Delhi
Sept 2011 – Sept 2014

- Provide technical support for software, hardware, operating system, printers and enterprise applications.
- Generate analytical and performance reports, supporting, decision –making processes.
- Assisted users is operating systems, email systems and internal applications
- Maintained documentation and ensured IT asset management accuracy.

Educational Qualifications

- MCA- Master of Computer Application, IGNOU, 2015.
- PGDCA - Post graduation Diploma in Computer Application, IGNOU, 2013.
- B.A English with Computer Applications, Jammu University, 2010.
- 12th- J&K Board 2006.

Achievements

- Received Spot Award for outstanding performance and service delivery.
- Implemented process improvements enhancing operational efficiency.
- Maintained high customer satisfaction through proactive incident management.

Strengths

- Strong problem- solving and analytical under pressure.
- Effective collaboration and communication with cross –functional teams.
- Quick learner, with adaptability to emerging technologies and environments.
