#462D ANAND COLONY GARHI ROAD, OLD HAMIDA, Yamunanagar (Haryana)

Summary

With 4 years of experience as a Support Engineer, I ensure the timely resolution of technical issues, meeting or exceeding SLAs. Using tools like JIRA, ITSM, and PRTG, I have strong knowledge of AWS, Azure, and Linux for server management.

Work History

- **At Vorro as Support Engineer**: Working from 31 October 2022 to till now.

  - Resolve customer issues within SLA, addressing application support, IP errors, and server issues.
  - Provide hands-on application support for daily operations, ensuring data and process integrity, configuration, user administration, reporting, and optimization.
  - Resolve customer issues using Jira, ITSM, and PRTG for incident tracking, service management, and proactive system monitoring to ensure timely, efficient support.
  - AWS/Azure management, handling client and product servers.
  - Deployment and creation of products on VMs and EC2 servers.
  - Conduct weekly AWS maintenance, including instance and service restarts and traffic checks.
  - Optimize AWS account costs through analysis and budgeting.
  - Proficient with hosting providers like DigitalOcean, InterServer, and Namecheap.
  - Work on client websites, including WordPress site maintenance (installation, editing).

- **At Movate as Operation Support Engineer**: Worked from 15 June 2020 to Oct 28 2022

  - Integration, Deletion of Node in NetAct or Ericsson ENM.
  - Troubleshooting & rectification of OSS Alarms, daily Health Chekup.
  - Troubleshooting Problems like Disk Space Utility, CPU Utilization, and Load.
  - Basic Linux Administrator work
  - ENM (Ericsson Network Management)
  - Ticket Management on Jira and ITSM Tools
  - Done AWS Maintained weekly (Instance and services restart and full check-up with traffic)
