Skilled in SQL, Python, Power BI, and cloud platforms like Microsoft Azure, with experience in data cleaning, transformation, Data Modeling and visualization.

Skills

Analytical Tool	Power BI, MySQL, Excel Charts.
Language	SQL(using Complex Queries), Python.
Libraries	Pandas, Numpy, Matplotlib, Seaborn.
Platforms	Pycharm, Jupyter Notebook, SQL Server, Vs Code.

Work Experience

December-2022 - March 2024

Accenture – Data Analyst

- Designed and developed interactive Power BI dashboards to track critical loan **KPIs**, including total loan applications, funded amount, average interest rate, non-performing assets (NPA), and loan approval ratio.
- Extracted, transformed, and loaded **(ETL)** large volumes of transactional loan data using SQL, ensuring accuracy, data integrity, and alignment with business rules.
- Built parameterized Power BI reports to analyze loan performance over specific periods, enabling stakeholders to filter insights by branch, region, or product type.
- Implemented **row level security(RLS)** and mapped multiple region clients to same dashboard that helped them to reduce the Building of multiple dashboards and save 30% of time in reporting.
- Built monthly reporting tools for financial performance and compliance monitoring.
- Optimized a **snowflake schema** for an analytics platform, improving database performance while ensuring accurate and scalable reporting across multiple business units.

Internship Experience

October 2024 – January 2025

Atliq Technology

- Designed a multi-view dashboard in Power BI for 6 departments (sales, finance, supply chain, executive, marketing, and products) of **Atliq hardware** to understand sales trends, facilitate data-driven decisions that scaled the business processes by 10%.
- Imported 2 different data sources (MySQL, and Excel) with more than 1 million records and performed data modeling.
- Our main goal was to craft a comprehensive report delving deep into **Atliq Hardware** operational performance, utilizing the advanced capabilities of Power BI.

Project Experience

January 2025- February 2025

Zomato A Food Delivery Company - Project-Link

- Analyzed customer behavior and insights, order sales Analysis and rider efficiency
- Applied window functions to analyze data in a more efficient manner, especially when calculating running totals, ranking Dishes based on user ratings like 5 Star, or finding trends across time frames without collapsing the results into a single group and high value customer identification order not delivered or more
- As a Data Analyst solved complex business problems including Top ordered dishes by customers, popular order time slot, average order value (AOV) Analysis.

Credit Card Analysis - Project-Link

- Used KPI's based on transaction, Total Interest, Total Revenue and Transaction Amount overall revenue is 57M
- Revenue Increased by 28.8%, blue & silver cards are contributing to 93% of overall transactions
- Analyzed male customers are contributing more in revenue 31M, 26M Female

Education

August 2019 - June 2022

World Peace University, Pune– *Masters of Computer Applications (9.23 CGPA)*
