OBJECTIVE

Self-motivated and detail-oriented MCA graduate with hands-on experience in Python, SQL, Data Structures, Flask, Power BI, and Database Management. Seeking a developer/analyst role to apply my technical skills in Python development, analysis, and visualization, contributing to business growth and innovation.

PROFESSIONAL EXPERIENCE

Dew Solutions Pvt. Ltd. — *Operations Trainee (Cilory)*
Nov 2024 – May 2025

- Assist in analyzing and improving existing processes for increased efficiency.
- Support senior operations staff in various tasks and projects.
- Analysis of daily operational performance and suggest improvements with cross-functional teams.
- Contribute to the creation of reports and documentation for operational processes.
- **Tools Used:** SQL, Excel, Google Sheet

Maruti Suzuki India Limited — *Project Intern*
Jul 2023 – Aug 2023

- Developed a database procedure and integrated it with a .NET web form.
- Designed a web page for fetching employee/customer details from the SQL database.
- **Tools Used:** SQL, .NET, MVC

EDUCATION

Qualification	Name of Institution	Year of passing
Master of Computer Application	SGT University	2024
Bachelor of Computer Application	SGT University	2022
12th (CBSE)	Gyan Deep Sr. Sec. School	2019
10th (CBSE)	Gyan Deep Sr. Sec. School	2016

CERTIFICATIONS

- **Data Analyst** – TCA Training & Development
- **Python Libraries (NumPy, Pandas)** – Coursera
- **SQL for Data Science** – Coursera
- **Python Developer** – Udemy
- **Data Analysis with Power BI** – AISECT

PROJECTS

Second-Hand Car Price Prediction

Developed and deployed a Linear Regression model using Scikit-learn to predict used car prices.

- Performed EDA and data cleaning with Pandas and Visualized trends using Matplotlib
- Deployed the model using Flask for real-time web access
- **Tools:** Python, Pandas, Scikit-learn, Matplotlib, Flask

Flight Fare Analysis & Prediction

Built a Random Forest Regressor to estimate flight fares with high accuracy.

- Conducted EDA and visualized trends using Matplotlib
- Designed a responsive Bootstrap front end
- Integrated and deployed with Flask
- **Tools:** Python, Flask, Matplotlib, Bootstrap, Random Forest

Pizza Shop Sales Analysis

Created an interactive Power BI dashboard for sales insights and performance metrics.

- Cleaned and transformed raw sales data using MySQL
- Visualized product performance, revenue trends, and customer segments
- **Tools:** Power BI, MySQL

TECHNICAL SKILLS

- **Languages:** Python, SQL, C, HTML, CSS, API, OOPS
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- **Tools:** Power BI, Tableau, Advanced Excel (VLOOKUP, HLOOKUP, Pivot Tables, Macros), MS Office
- **Databases:** MySQL, Oracle, MongoDB
- **Soft Skills:** Problem Solving, Client Relationship Management, Analytical Thinking, Team Collaboration
