Professional Headline

CCNA-Trained Network Engineer | IP Surveillance & Routing Expert | Seeking Role in Enterprise Networking | BCA Undergraduate

Professional Summary

CCNA- Trained Network Engineer with hands-on experience in routing protocols (OSPF, BGP), LAN/WAN infrastructure, and IP surveillance systems. Skilled in diagnosing and resolving network issues across switches, routers, and servers. Proficient in simulation tools like Cisco Packet Tracer and GNS3. Successfully delivered projects for large-scale railway surveillance infrastructure. Currently pursuing BCA and looking to grow in enterprise networking roles within the IT industry.

Education

Bachelor of Computer Applications (BCA) – Vivekananda Global University – CGPA: 7.8 (Pursuing)

12th – State Board (2023): 69%

10th – State Board (2021): 81%

Technical Skills

Networking: LAN, WAN, VLAN, MPLS, Subnetting

Protocols: TCP/IP, BGP, OSPF, EIGRP, VPN, STP

Tools: Cisco Packet Tracer, GNS3, Wireshark

Hardware: Routers, Switches, Network Servers

Others: IP Camera Setup, Remote Surveillance, Network Monitoring

Professional skills

- Network Troubleshooting and Maintenance.
- System Configuration and Monitoring.
- Performance Optimization.
- Network configuration. IP camera configuration.
- Networking and routing protocol experience.

Professional Experience

Network Engineer — DKPL Networks (Dec 2024 – Present)

- Configured and maintained enterprise-grade network infrastructure.
- Monitored performance and ensured high uptime with proactive troubleshooting.
- Reduced critical downtime by implementing real-time monitoring using Wireshark.

Network Engineer — Technosys Security System, Chennai (July 2024 – Dec 2024)

- Deployed and configured 1000+ IP surveillance cameras for Indian Railways.
- Diagnosed and resolved complex network issues related to switches and connectivity.
- Optimized network performance, resulting in a 25% increase in system reliability.

Projects

Enterprise Network Simulation (GNS3 & Packet Tracer)

- Designed multi-area OSPF and BGP topologies for learning enterprise scenarios.
- Practiced VLAN segmentation and router redundancy (HSRP).

IP Surveillance Integration Project

- Installed & remotely configured IP cameras for railway stations.
- Ensured seamless connectivity and uptime through switch-level optimization.

Soft Skills

Strong Communication & Technical Reporting

Team Collaboration in Field Environments

Analytical & Troubleshooting Mindset

Detail-Oriented & Proactive Learner

Languages

English

Hindi

Career Goal

To build a strong career as a Network Engineer, focusing on enterprise network infrastructure, routing protocols, and network security. I aim to grow within a dynamic IT organization where I can apply and expand my expertise in core networking technologies like BGP, OSPF, VLANs, and WAN connectivity.
