Paschim Vihar, New Delhi - 110063

Profile

Data Analyst with strong skills in Python, SQL, Power BI, and Tableau, specializing in data cleaning, exploratory analysis, dashboard development, and delivering actionable insights for business decision-making. Experienced in segmentation, A/B testing, and performance reporting across platforms such as Amazon SES, Mailgun, Brevo, SendGrid, Braze, Marketo, and Salesforce Marketing Cloud. Adept at optimizing email deliverability through SMTP configuration and enhancing overall campaign performance through analytical process improvements.

Technical Skills

- Programming/Tools: Python, MySQL, Power BI, Tableau, Excel, Node.js
- Data Science: Sentiment Analysis, Machine Learning, Data Cleaning
- Web & Email Tech: HTML, CSS, JavaScript, SMTP Setup
- Marketing Platforms: Amazon SES, SendGrid, Mailgun, Brevo, Braze, Marketo, HubSpot, Salesforce Marketing Cloud, Klaviyo, ActiveCampaign

Soft Skills

- Communication
- Problem Solving and Critical Thinking
- Time Management and Meeting Deadlines
- Teamwork and Collaboration
- Leadership and Initiative
- Adaptability

Languages

English, Hindi

Professional Experience

Email Marketing Analyst March 2025 – Present

CourseIQ Edutech LLP

• Planned, designed, and executed data-driven email marketing campaigns to improve engagement, retention, and conversions across multiple audience segments.
• Conducted audience and market analysis using SQL and Excel for data cleaning, segmentation, and performance tracking to support data-driven decision-making.
• Configured and optimized a custom SMTP server to enhance deliverability, streamline sending infrastructure, and reduce reliance on third-party providers.
• Generated weekly performance dashboards (pivot tables, lookups, trend analysis) and monitored key metrics (CTR, open rate, bounce rate, conversions) to deliver actionable insights.
• Worked with major marketing automation platforms including Marketo, Braze, Salesforce Marketing Cloud, HubSpot, Klaviyo, ActiveCampaign, and other trending tools used across the email marketing industry.

Data Analyst Intern Jan 2025 – March 2025

GlobalLogic – Hitachi

- Assisted in a social media sentiment analysis project using Python and NLP techniques to analyze customer opinions and brand perception.
- Cleaned, pre-processed, and organized raw social media data to improve model accuracy and insight quality.
- Performed EDA using Pandas, NumPy, and Matplotlib to identify trends and sentiment distribution patterns.
- Prepared dashboards and summary reports to communicate key insights to the analytics team.
- Supported daily tasks including data collection, validation, and dataset preparation for internal analysis.

Data Analyst Intern Jun 2024 – Aug 2024

IBM

- Completed a 6-week Data Analyst internship at IBM, gaining hands-on experience with data analysis and visualization tools.
- Conducted data cleaning, transformation, and analysis using tools such as Excel, SQL, and Python.
- Developed and presented data-driven insights to support business decision-making processes.
- Collaborated with cross-functional teams to optimize data workflows and streamline reporting.

Education

Master of Computer Applications (MCA) 2023 – 2025

Vivekananda Institute of Professional Studies, Delhi *Percentage: 89%*

Bachelor of Computer Applications (BCA) 2020 – 2023

Bharati Vidyapeeth Deemed University, Delhi *Percentage: 90%*

Projects

1. **Covid-19 in India Dashboard Analysis using tableau**

- Developed an interactive Covid-19 dashboard to visualize key pandemic metrics.
- Processed and analyzed government data for accuracy and trends. Created dynamic visualizations for insights into regional patterns.

2. **Diwali Sales analysis project using python, Pandas and numpy**

- Conducted EDA on Diwali sales data to identify sales trends.
- Used Pandas and NumPy for data cleaning and statistical analysis. Visualized patterns using Matplotlib.

3. **ZoFit – A Fitness Website integrated with Cloud Kitchen**

- Developed "ZoFit," a Fitness Recommendation, nutrition guidance, and Cloud Kitchen integration.
- Designed using AI, Html, CSS, JavaScript and ReactJS.
- Designed Fitness Recommendation module.

Certifications

- Participated in Smart India Hackathon (SIH), Government of India
- Published A Research Paper
- IBM Data Analyst Internship Recognition
- Hackathon Participant – VSIT Tech Fest

Publications

Published Research Paper on

Advancing Predictive Modelling of Heart Disease Through Data Analysis and Feature Engineering

Published at ICSDCT 2025, organized by VIPS-TC, Delhi. Focused on improving heart disease prediction through ML models (Logistic Regression, Random Forest, KNN, SVM) and Jellyfish Optimization using Python-based feature engineering and preprocessing.
