Devops Engineer

Results-driven DevOps Engineer with **3.0 years of experience** in building and automating CI/CD pipelines, container orchestration, and scalable infrastructure. Proficient in tools like **Docker, Kubernetes, OpenShift, Ansible, AWS**, and strong in **monitoring (Dynatrace, ELK, Prometheus)**. Adept at optimizing workflows, improving system reliability, and driving automation. Seeking to contribute technical expertise and innovative solutions in dynamic environments.

WORK EXPERIENCE

Wipro Limited. **11/2024 – Present**
Devops Engineer

- Automated configuration management using **Ansible**, creating reusable playbooks and roles.
- Managed **Kafka** for real-time data streaming and Redis for efficient caching and performance optimization.
- Deployed containerized apps on **OpenShift (OCP)** using **Docker**.
- Automated image deployments by writing **Shell scripts** on the Bastion server, reducing manual intervention by 60% and accelerating release cycles.
- Administered **EDB PostgreSQL** and **Oracle databases** for optimal data performance.
- Automated API testing with **Postman**, increasing early issue detection.
- Ensured system uptime using **Dynatrace** and **ELK Stack** (Elasticsearch, Logstash, Kibana).

OliveCryptoSystems Pvt Ltd. **11/2022-10/2024**

Devops Engineer

- Orchestrated containerized microservices with **Docker** and **Kubernetes**, ensuring high availability.
- Administered **MySQL** databases, focusing on performance, backup, and troubleshooting.
- Monitored applications using **Kibana**, **Grafana**, and **Dynatrace** for proactive performance management.
- Worked cross-functionally to optimize workflows, resource use, and support production environments.

PROJECTS

Billing and Charging System | Banking Domain 11/2024-Present

Wipro Limited

Tools & Skills: OpenShift, Redis, PostgreSQL, Kafka, Ansible, Dynatrace

- Monitored systems using Dynatrace and Kibana, with customized alerts and dashboards.
- Used Redis for in-memory caching to improve data access speed and fault tolerance.
- Analyzed traffic and service meshes with Kiali for better microservices visibility and debugging.

CBDC (Central Bank Digital Currency) | Banking Domain 11/2022-10/2024
OliveCryptoSystemsPvtLtd.

Tools & Skills: Kubernetes, Docker, MySQL, Kafka, Blockchain

- Containerized microservices using **Docker** and managed deployments with **Kubernetes**

- Integrated **Kafka** for secure and scalable real-time data streaming.
- Designed optimized **MySQL** schemas supporting transactional & analytical use cases.
- Integrated **blockchain** for immutable and transparent transaction processing.
- Collaborated with development and QA teams to streamline release processes and improve system reliability.
- Implemented monitoring solutions with **Kibana**, **Grafana**, and **Dynatrace** for proactive issue resolution.

SKILLS

- Containerization & Orchestration: Docker, Kubernetes, OpenShift

- Configuration & Automation: Ansible, Helm, Shell Scripting, Istio

- CI/CD & Cloud Tools: Jenkins, GitHub Actions, AWS

- Monitoring & Logging: Dynatrace, ELK Stack, Prometheus, Grafana, CloudWatch

- Databases & Messaging: MySQL, PostgreSQL, Kafka, Redis

- Scripting & Tools: Bash, Git, Postman

EDUCATION

Master of Business Administration.

Sri Y.N.College Narsapur 07/2019 - 04/2021

Certifications

- AWS Certified Solutions Architect – Associate (Issued by Future Prime Skills)
