SHIVAM KUMAR

New Delhi, India | rishushivam999@gmail.com | 7982335705

PROFILE SUMMARY

Shivam Kumar

Integration Consultant with strong hands-on experience in supporting, configuring, and validating enterprise system integrations. BTech graduate in Information Technology with a high academic record (GPA 9.12). Experienced in working with structured data feeds, system troubleshooting, UAT validation, and cross-team coordination to ensure reliable data flow between business systems. Adept at understanding functional requirements, analyzing errors, and delivering stable integration solutions in fast-paced client environments.

EDUCATION

Guru Gobind Singh Indraprastha University | BTECH Delhi, India | 01/2021-05/2025

- Cumulative gpa: 9.122/10.00

PROJECT / EXPERIENCE

Integration Consultant Associate BirchStreet Systems | November 2024 – Present

• Supported end-to-end implementation of system integrations between BirchStreet and client ERP/POS platforms using structured flat files and scheduled jobs
• Analyzed client requirements and mapping documents to ensure accurate data flow for purchasing, invoicing, receipts, inventory, and finance processes
• Monitored inbound and outbound integration feeds, identified failures, and performed root cause analysis to resolve transmission and data validation issues
• Debugged and resolved 50+ production and UAT issues, reducing integration downtime by approximately 30%
• Validated feed file formats, naming conventions, field sequencing, and data accuracy against functional specifications • Executed unit testing, integration testing, and UAT, documenting over 100+ test scenarios and results
• Coordinated with development, QA, and back-office teams to deploy fixes and configuration updates
• Performed database-level validation using SQL to verify transaction records, status updates, and reconciliation
• Assisted in reprocessing failed transactions and ensured data consistency across systems
• Maintained detailed technical and functional documentation to support client communication and audits
• Actively participated in client calls for requirement gathering, clarification, and walkthroughs of integration behavior
• Acted as a bridge between clients and development teams to translate business requirements into clear, actionable technical specifications
• Ensured requirement alignment by validating understanding with both stakeholders, reducing rework and miscommunication
