EDUCATION

Galgotias University **Greater Noida, Uttar Pradesh**
B.Tech in Computer Science *Expected Graduation, June 2025* ***Current*** **CGPA:** 7.67

PROFILE SUMMARY

Final-year CSE student with practical experience in full-stack web development, Java applications, mobile app development, and machine learning. Experienced in Java, HTML/CSS, Node.js, MongoDB, MySQL, and Python. Developed projects such as Wanderlust website, ForensicSuite Modern Criminal Management System, fraud detection model, and a Tic-Tac-Toe application. Proficient in RESTful APIs, UI design, and database management. Learning the MERN stack now.

PROJECTS

Project Title: Wanderlust Website (Frontend and backend)

Frontend:

- **HTML5 & CSS3** – For structuring and styling the web pages.
- **Bootstrap** – To ensure responsive, mobile-first design with pre-built components.
- **EJS (Embedded JavaScript Templates)** – For dynamic content rendering on the server side.

Backend:

- **Node.js & Express.js** – To build and manage the server-side application logic and routing.
- **MongoDB** – NoSQL database used to store user, place, and review data.
- **Mongoose** – For modeling application data and simplifying database queries.

Tools:

- **npm** – For managing packages and project dependencies.
- **Git & GitHub** – For version control and collaborative development.

Responsibilities:

- Designed and implemented user interfaces using **HTML**, **CSS**, and **Bootstrap** to create a responsive and visually appealing experience.
- Developed dynamic EJS templates to render listings, details pages, and navigation components based on database content.
- Set up **Express.js** routes and middleware to handle HTTP requests, sessions, and user interactions.
- Built and connected **MongoDB** models using **Mongoose** to manage lodging data, including creation, retrieval, and deletion.
- Implemented RESTful routing for listings (Create, Read, Update, Delete).
- Handled error pages and form validation to improve user experience.
- Utilized Git and GitHub for version control and collaboration tracking.

<u>Project Title:</u> ForensicSuite: Modern Criminal Management System August2024- January 2025

Technologies Used: JavaSE/EE,NetBeans or IntelliJ IDEA, Hibernate/JPA,Java Swing/JavaFX,Apache Maven (for project management**)**

Responsibilities:

- Defined project scope, timeline, and deliverables.
- Assigned tasks, tracked progress, and ensured milestone completion.
- Designed system architecture and optimized database schema.
- Implemented business logic in Java and developed RESTful APIs.
- Created responsive user interfaces using Java Swing/JavaFX.
- Ensured data integrity, performance tuning, and secure database operations.
- Conducted security audits, implemented authentication, and encrypted data.
- Developed and executed test cases, performed unit and integration testing.
- Prepared technical documentation, user manuals, and installation guides.
- Provided post-deployment support, handled bug fixes, and monitored system performance.

Certifications / Training:

DSA Bootcamp – Galgotias University

Completed an intensive bootcamp focused on Data Structures and Algorithms using Java. Covered topics like arrays, linked lists, stacks, queues, recursion, sorting & searching, and problem-solving techniques. Strengthened coding logic and competitive programming skills.

SKILLS

Skills: Java, HTML/CSS, MySQL, Frontend Developer, EJS, (MERN learner), MS Word, GitHub, Node.js,

Tools: Android Studio, PyCharm, Eclipse, Bootstrap, NetBeans, VS Code, Node.js
